

## Supercritical CARbon dioxide/Alternative fluids Blends for Efficiency Upgrade of Solar power plant

### -PRESS RELEASE-

The first review meeting of the SCARABEUS project took place on July 2<sup>nd</sup> 2020, upon completion of the first reporting period. The meeting was held virtually, given the restrictions set by the COVID-19 pandemic.

The project partners presented the progress made during the first 12 months of the project. All the project deliverable reports have been submitted to the European Union by the due date and only one out of the four milestones scheduled in the first year has experienced minor delays, due to problems in the supply chain of special metals brought about by the pandemic.

SCARABEUS is a 48-month project starting in April 2019 and ending in March 2023, coordinated by Prof. Giampaolo Manzolini, Politecnico di Milano (Italy). The project is funded by the European Union's Horizon 2020 research and innovation programme under grant agreement No 814985.

SCARABEUS partners	
Academia and R&D	Industry
Politecnico di Milano (IT)	Baker Hughes (IT)
University of Seville (ES)	Kelvion (FR)
City, University of London (UK)	Abengoa (ES)
Vienna University of Technology (AT)	Quantis (CH)
University of Brescia (IT)	

**Project Coordinator:**

Giampaolo Manzolini  
Dipartimento di Energia  
Politecnico di Milano, Italy
